

Setting Oracle Passwords for the EDW

Set or Change Oracle Password to view data from the Enterprise Data Warehouse (EDW):

1. Access the Data Warehouse Password Management Application:
<https://appserv7.admin.uillinois.edu/dspwdmgmt>
2. Log in using your University NetID and password
3. Select the desired Account ID

Data Warehouse Password Management Application: Account Information

You have successfully logged into the Data Warehouse Self Service Password Management Application.

Changing your password via this application will not change your password for logging into EDDIE (**EDDIE**). This application will only change the password used for connecting to the data warehouse directly. To change your password for logging into EDDIE, use the IAM password management application found at (**IAM Password Management App**). If you are unsure which application to use to change your password, please email Decision Support at dsuss@uillinois.edu.

NetID: sjadams
Name: Stephanie Adams
UIN: 677214780
Dept: Admin Info Technology Services

Please click on the account name below that you would like to reset the password for:

| Account ID | BO | Oracle |
|-----------------------------|------------------|---------|
| sjadams | Enabled | Enabled |
| lst_sjadams | No Account Found | Enabled |

4. Click **Reset Password** at the bottom of the screen.

Account ID: sjadams

| Environment | Account Status |
|---------------------------|--------------------------------|
| Data Warehouse (DSPROD01) | Account sjadams found Enabled. |
| Eddie/BusinessObjects | Account sjadams found Enabled. |

Please click the "Reset Password" button below if you would like to reset your password.

5. Create a **new password** and **verify** (see below for strong password rules)
6. Click **Reset Password**.

When setting the password, the strong password rules are printed to the right of the password boxes. The rules are in red and will turn green when the criteria is met. After all the rules have been met, the reset password button will be enable (turn black).

- New Password and Verify must match
- Length (8-12 characters)
- Three Character Classes (Upper case, Lower case, Numeric)
- No invalid characters (Only alphanumeric and ._-!\$#)
- Does not contain parts of: Name, Account ID
