

Adding Additional Objects to an Existing Query

If you need to add additional objects to an existing query:

1. Click the  Edit Data Provider button

2. Locate the object(s) to add and add them to the Result Objects panel.

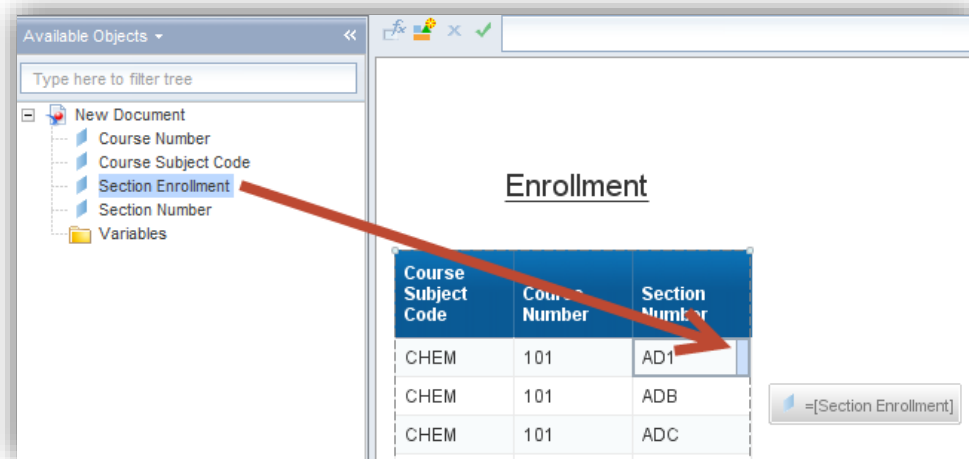

3. Click the **Run Query** button.

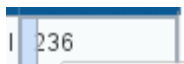

Note:

You will notice that the new object is not displayed in your report table.

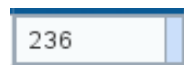

4. Open the **Available Objects** menu.
5. Drag the new object into the table. Drop in desired location:

Use the blue rectangles to determine the location of the new column:

Insert column to the left of current column

Insert column to the right of current column

Replace column with new column

The new object is now displayed in your report table:

Course Subject Code	Course Number	Section Number	Section Enrollment
CHEM	101	AD1	26
CHEM	101	ADB	26
CHEM	101	ADC	25
