

## AITs Decision Support Data Warehouse Access Plan

The following document describes the security access roles available to users. Each page of the document describes a unique Job Category and each of the Data Subject Areas that can be requested within that Job Category. These two pieces of information – Job Category and Data Subject Area – will be used by the Unit Security Contact (USC) to request access in the DS USC Application.

Some of the Job Categories were created for a specific unit, to deliver specific data relevant to its work, and as such, the user will need to be employed by that unit to receive access. The first column – Organizational Category – will let you know which users are able to receive access. Functional Office, for example, would require a user to be employed by that functional office to receive access (Technology Services, OAR, Campus HR, etc.). Also, depending on the USC's unit, some of the Job Categories in this document may not be available/visible to them in the DS USC Application.

<u>Column</u>	<u>Description</u>
Organizational Category	Lists which unit, if any, the user must be affiliated with to receive access
Job Category	<b>Matches the DS Job Category list in the DS USC Application</b>
Description	Describes the employees who would require access
Data Subject Area	Subject area of data being requested; <b>matches the Data Subject Area list in the DS USC Application</b>
Data Group	More granular group of data within each Data Subject Area
Types of Records	Types of information contained in the Data Subject Area and/or Data Group, including any excluded data
Data Restrictions	Levels of restriction available (Campus or Campus/College or Campus/College/Dept)
Oracle Roles	Name of the Oracle role corresponding to the Data Subject Area and/or Data Group; used for ODBC connections
BI Access Roles	Name of the BI Access role corresponding to the Data Subject Area and/or Data Group; used for EDDIE
BI Products	Names of the universes that can be accessed with the Data Subject Area and/or Data Group in EDDIE

### Example of how to use the Data Warehouse Access Plan:

I'm a USC for an academic college on the UIUC campus, and I've got a new employee starting this week who will be working in the college's business office. I need to request access to the Data Warehouse for them so they can perform their job duties related to reporting. I would start by scrolling through this document to find a Job Category that fits the employee's main job function. Since this employee will be working in the business office, the Finance Manager category would work, as would any of the more general categories (Data Analyst, for example). Then I would go through each Data Subject Area, looking at the types of records and restrictions, noting each subject area the employee will need access to. Then, login to the DS USC Application, and use the Job Category and Data Subject Area(s) noted to complete the request for access.

Organizational Category	Job Category	Description	Data Subject Area	Data Group	Types of Records	Data Restrictions	Oracle Roles	BI Access Roles	BI Products
Functional Office	Campus HR Staff	Staff member of central office with central create/read/update/delete responsibilities for HR data at a campus level	Finance access is not available to Campus HR Staff	not applicable			none granted	none granted	
			HR/Pay	HR Employee	All employees (including student employees) <b>Includes SSN, Birth Date and Age Excludes Medical Condition, Veteran, Vietnam service, Payroll net pay amount and Disability information</b>	HR/Payroll data is restricted by Campus OR Campus/College OR Campus/College/Dept	HR_HR_USER	HR_HR_USER Power Users	EDW - HR Employee Administration (HR-EMP)
				HR Position/Job					EDW - HR Position and Job Hierarchy (HR-PJH)
				HR Payroll					EDW - HR Payroll (HR-Pay)
									EDW - HRFIN BOS Payroll (BOSPAY)
									DM - HR Payroll Reconciliation
				HRFE					EDW - HRFIN BOS Expenses (HRFinExp)
				HR Time and Attendance					EDW - HRFE Paris Transactions
				Salary Planner					EDW - HRFE Paris Security
				PRMS					EDW - HR Leave Tracking (HRLvTrk)
									EDW - HR Reported Time (HRRptTm)
				Retiree Rehire	Retiree Rehire information	EDW - HR Salary Planner (HR_SLRYP)			
				Headcount FTE Analysis OLAP Cube *	Employee, Position and Job data.	EDW - HR PRMS Employee Requisition			
						EDW - HR PRMS Exam			
						EDW - HR PRMS Extra Help			
						EDW - HR PRMS Security			
						EDW - HR Retiree Rehire			
			STU Financial Aid Access requests must be approved by Financial Aid Office	Financial Aid Data Mart	Financial Aid awards UIUC <b>Includes SSN</b>	FinAid data is restricted by Campus	DM_FINAID_LEVEL1	FA Power Users Most Restricted	DM_STU-Fin Aid Awards by Term (FA_DM_TR)
									DM_STU-Fin Aid Awards by Year (FA_DM_YR)
			STU Pre-Registration & Registration	PRR Registration Directory	For student enrollments, this contains student name, address, email, telephone numbers, date of admission, date of birth, previous institutions attended, terms of attendance including campus/location and full or part-time status, college, curriculum, class level, expected graduation date, participation in official activities and sports.	PRR data is restricted by Campus OR Campus/College OR Campus/College/Dept	PRR_DIR	PRR Power Users - Directory	EDW - STU Registration Directory (PRR_Dir)
			STU Records & Transfer Articulation	Records & Transfer Articulation	For student degrees, this contains student name, address, email, telephone numbers, date of birth, terms of attendance including campus/location, college, curriculum, class level, and basic graduation information including degrees, honors and certificates	RTA data is restricted by Campus OR Campus/College OR Campus/College/Dept	RTA_DIR	RTA Power Users - Directory	EDW - STU Records Directory (STU_DIR)
			Historical Help Desk	CA Helpdesk Reporting	Contains historical helpdesk data from the CA Service Desk Manager application. The information includes ticket details (customer, requestor, assignee, reporter and activity log), knowledge base solutions, surveys, and group membership.	Applicable for all CA Service Desk Manager users.	UNCTR_HDESK_USER	Helpdesk Power User	EDW - Helpdesk Reporting
			Service Desk Reporting	Service Desk Reporting	Provides access to Service Desk and Time Reporting data. This includes ticket details, feed activity, assignments, survey responses, ticket tasks, and workgroups, as well as employee timesheet information such as employee details, timesheet dates, hours worked across projects and workspaces, billable and unbillable hours, and time breakdowns by day, month, year, fiscal periods, and fiscal year.	Applicable for all Technicians in Team Dynamix.	WMS_USER	WMS Power Users	Service Desk Reporting Time Reporting
			Historical System Status Std Rpts and Universe	System Status Reporting	Business Objects Universe and Standard Reports containing historical data about the IT service outage and maintenance events posted by IT support specialists to the status website via the system status web application..	Applicable for all System Status Application users	none granted	System Status User	AITS Apps - System Status

\* Users must have HR Access and Explicitly request access to Headcount FTE Analysis OLAP Cube.

Organizational Category	Job Category	Description	Data Subject Area	Data Group	Types of Records	Data Restrictions	Oracle Roles	BI Access Roles	BI Products
Any Unit	Capital Programs user	Responsibilities for tracking capital programs projects	Finance	Capital Programs	Data related to capital programs projects including timelines, budgets, awards, and payments.	No data restrictions	CP_USER	CP Power User	EDW - Finance Capital Programs - FAMIS
									EDW - Finance Capital Programs - PRZM
				Dashboard	MAFBE Awards				MAFBE Dashboard
			HR/Pay access is not available for Capital Programs User	not applicable			none granted	none granted	
			Student access is not available for Charitable Contributions Managers	not applicable			none granted	none granted	
							none granted	none granted
