Decision Support will add the message tables (RFRMESG and RTVMESG) associated with Fund Codes to the Data Warehouse. The two tables will be combined into one table and mend T_FA_FUND_MSG_ASSIGN_HIST. With this the weath table, users will be able to report on the specific message codes for each fund code in the Data Warehouse and the information will be available to the Financial Aid datamarts. 11/5/2009 Add UDF Columns for Financial Aid Census Project As part of the scope of the Financial Aid census Project, users need to report on UDF's by the column name it is assigned (currently 1-360). Decision Support will modify the EDW to pull in these columns from ROBUSDF. Each UDF column name will have its own column in order to eliminate queries resulting in multiple rows per student. The new tables will be named T_FA_UDF_VALUE_HIST and T_FA_UDF_DESC_HIST. Past loan history stored in a UDF for the 0304 academic year will be included as well. 11/10/2009 Correct Activity Date Fields in Financial Aid Tables Decision Support will deploy updates to 38 Data Warehouse Fin Aid tables listed. This deployment will accommodate the ability to have NULL activity date fields in the Data Warehouse are currently set to NOT NULL, so DS will change the Data Warehouse so when a NULL activity date is encountered, it will be replaced with T_FA_STUDENT_BUGG_COMPNT SYSDATE-1.
