Operational changes are modifications to data or Decision Support solutions including data quality, performance, adjustment, defect, and processing changes.

Date / Subject Area / Type (Enh./Oper.) / Reference Number	Title / Summary Description	Areas Affected (Universes / Dashboards / Cubes / Tables / Views, etc.)
4/22/2010 Student Operational 20091006_R145551	**Updated Max Test Score Data Warehouse Processing Logic** Decision Support updated the Data Warehouse processing logic for the Registration Census Maximum Test Score table (T_RS_MAX_TEST_SCORE). This update enabled the processing to pull the max test scores regardless of date, provided the current information indicator is Y or N, at each given Registration Census snapshot. If the row is D = Deleted, the processing ignores these rows for the population of this table.	T_RS_MAX_TEST_SCORE
4/22/2010 Student Operational 20091221_R219556	**Corrected Data Warehouse Processing for the Student AH Course Grade History Table** Decision Support corrected a portion of the Data Warehouse processing for the Student AH Course Grade History table. The change corrected data quality errors received when the effective date was updated for update per student per course per grade seq number and two rows existed for this grain: one deleted and one expired (or current). The correction allowed the Data Warehouse processing to accommodate this scenario.	T_STUDENT_AH_CRS_GRADE_HIST
4/22/2010 Student Operational 20100128_R272964	**Purged Old Data from Student Course Registration Archive Table** Decision Support removed data older than the three current terms (e.g., XYYYY1, XYYYY5, XYYYY8) from the Student Course Registration Archive table to provide better query performance on this data and free additional storage space in the Data Warehouse.	T_STUDENT_CRS_REG_ARCHV
4/22/2010 Student Operational 20090615_R38442	**Added SAT Writing Scores to Maximum Test Result Table** Decision Support added three SAT Writing Scores (1803, 2803, and 4803) to the Maximum Test Result table and the Current Applicant Universe.	T_MAX_TEST_RESULT EDW - STU - Current Applicant
4/22/2010 Student Operational 20080919_608 (R25225)	**Removed and Stopped Loading Non-MA, PA, or RH Addresses for RC Address Table** Decision Support will kept Mailing Address (MA), Permanent Address (PA), and Residence Hall (RH) address data, but removed all other address types (e.g., BI, C1, W2) from the RC Address table because they were not necessary. Data Warehouse processing was changed to only load active MA, PA, and/or RH addresses to the RC Address table.	T_RS_ADDR
4/22/2010 Student Enhancement 20100305_R399078	**Added Outer Joins between Course Schedule Tables** Decision Support added outer joins in the Course Schedule Universe between the Faculty Instructional Assignment and Section Meeting tables. The outer joins allow the additional rows to appear in a report if an instructor is not assigned. Previously, the joins between the two tables were set as inner joins and thereby not showing all the Course Reference Numbers. Subsequently, users could not determine CRNs that did not have instructors assigned.)	EDW - STU Course Schedule T_FAC_INSTRN_ASSIGN T_SECT_MEETING
4/22/2010 Student Enhancement 20100304_R398154	**Added Join between Student Registration Complete Views** Decision Support added a SQL join in the Student Registration Complete universe to accommodate changing business requirements. The new join is between the high school data (V_HS_HIST_PRR_FULL_LTD) and the high school subject data (V_HS_SUBJ_PRR_FULL_LTD) on SBGI code. Without the added join, HS subject data was reporting based on the student, not necessarily linked directly to the student's related high school record.	EDW - STU Registration Complete V_HS_HIST_PRR_FULL_LTD V_HS_SUBJ_PRR_FULL_LTD
4/22/2010 Student Enhancement 20100305_R397174	**Added Security Role to Universe and Table** Decision Support added the security role PRR_FULL to the Admission Std High School History table and the Student Registration Complete universe to allow the appropriate users access to this data.	EDW - STU Registration Complete T_ADM_STD_HS_HIST

4/22/2010 HR Operational 20090806_R69504	**Moved Prompt in HR Front End Security Universe** Decision Support moved the prompt for User UIN from the User Folder to the User Security Folder (immediately following the Name fields).	EDW - HR Front End Security
4/22/2010 HR Operational 20090806_R69481	**Added Total Number of Components to the HR Front End Transactions Universe and Tables** Decision Support added the total number of components that exist for a particular type of transaction to the HR Front End Transactions Universe and tables.	EDW - HR Front End Transactions
4/22/2010 HR Enhancement 20090806_R69061	**Changed Business Rules for HR Front End** Decision Support changed the business rules regarding effective and personnel dates by transaction type that have been documented as part of the HR Front End process. These changes assist users when prioritizing transactions by calc date in the HR Front End application. The changes were as follows: 1. Excluded component types 91, 98 and 99 2. New business rules for Component Effective Date and Personnel Date 3. Accommodated "T" condition to derive personnel date for all component types 4. Accommodated 2 date formats (6 digit and 4 digit)	EDW - HR Front End Security EDW - HR Front End Transactions T_HRFE_TRAN_TYPE T_HRFE_TRAN_COMPNT T_HRFE_TRAN_CHG T_HRFE_EVENT_LOG T_HRFE_NEW_MSG_OBJ T_HRFE_TRAN_CHANGE
4/22/2010 HR Enhancement 20100308_R400296	**Added E-Verify Data to the HR Payroll Universe** Responding to changes in how the University will implement e-verify for HR data, Decision Support added e-verify data to the HR Payroll universe to assist with the revised reporting needs. Specifically, users only e-verify those employees who are paid from the specific grants that have the e-verify contractual language. This change provided an easy way to tie e-verify data to payroll data.	EDW - HR Payroll
4/22/2010 HR Enhancement 20091029_R168776	**Added Armed Forces Service Medal Indicator** Decision Support added a new column, "Armed Forces Service Medal Indicator", to the Person History table and the V_EMPEE_PERS_HIST_5 view to assist users with VETS100 reporting.	T_PERS_HIST V_EMPEE_PERS_HIST_5
