11/14/2019	Incorrect payroll encumbrance transaction dates in Finance Data Mart	T_FIN_PAYR_END_BAL_FACT	PAYR_ENC_BAL		
Finance	Payroll encumbrance data is included in the data mart for My-UI Financials. Currently the ETL assumes that each payroll encumbrance transaction is not modified after it is created. There is a UI Banner mod that updates the transaction date due to shortcomings in the Banner application, but normally this update occurs within a payroll run and so does not affect the quality of the data in the data mart. However, if a payroll run executes past the time when reptprod is recreated each night, then the data mart will contain the original, incorrect date. The goal of this case is to change the relevant mapping from add-only to add-update so that these updates will be processed going forward.
