## Correcting Web Intelligence File Association

- 1. Click on the START menu
- 2. Select Default Programs

3. Select Associate a File Type of Protocol with a Program

## Choose the programs that Windows uses by default Set your default programs Make a program the default for all file types and protocols it can open. Associate a file type or protocol with a program Make a file type or protocol (such as .mp3 or http://) always open in a specific program. Change AutoPlay settings Play CDs or other media automatically Set program access and computer defaults Control access to certain programs and set defaults for this computer.

- 4. Select the .wid file extension
- 5. Click the Change Programs button. (upper right corner)

## Associate a file type or protocol with a specific program

Click on an extension to view the program that currently opens it by default. To change the default program, click Change program.
