

## Document level input controls

You can now apply an input control to all reports within a document.

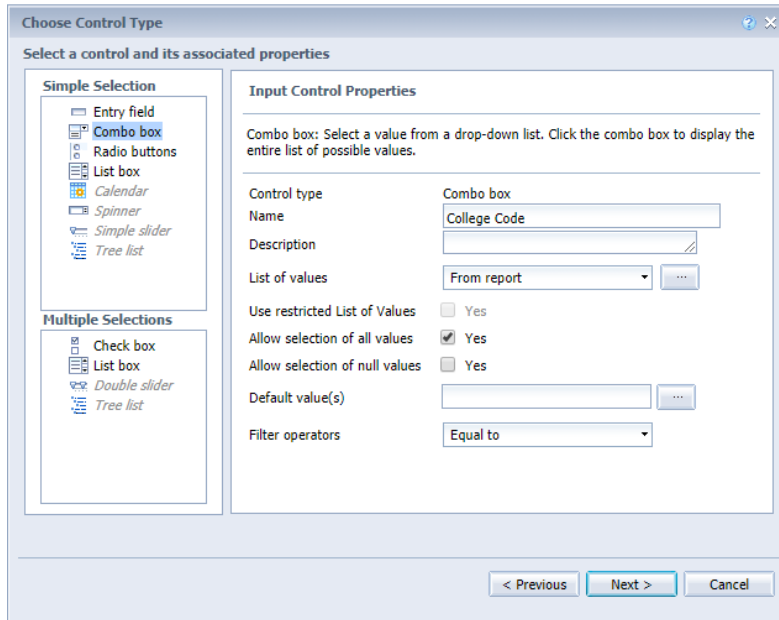

1. Click the Input Control button on the left
2. Click New to add new input control

3. Select Report Object
4. Click Next

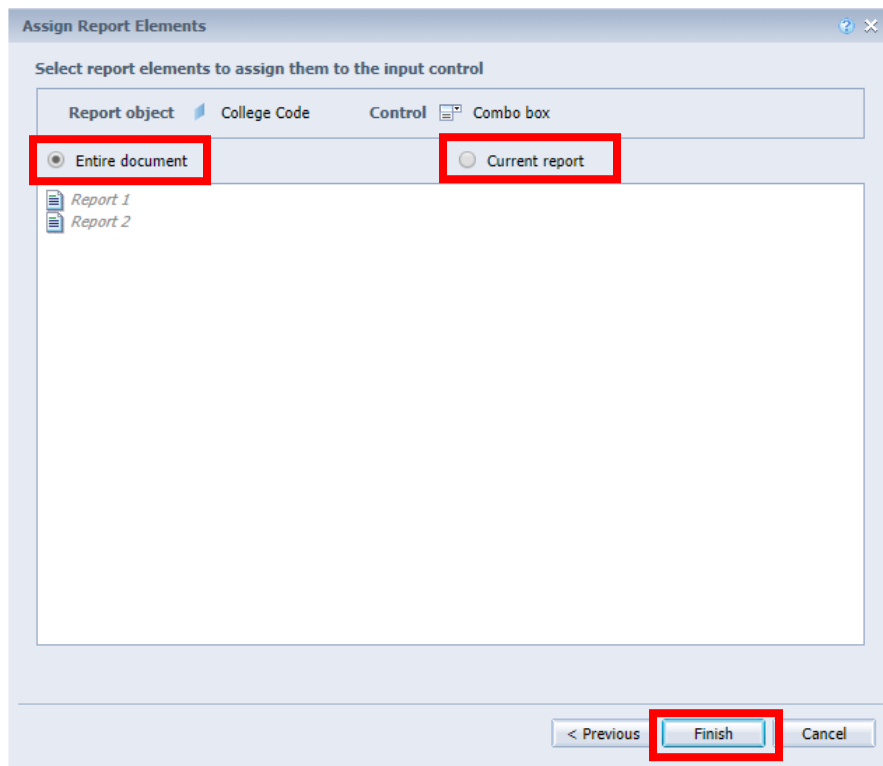

## 5. Choose Control Type and click Next

## 6. Assign Report Elements

- Select Entire Document to apply an input control to all reports within a document
- Select Current Document to apply an input control to the current document

## 7. Click Finish

8. The document Input Control(s) and the Report Input Controls are shown in the Input Control Panel
