

Formatting multiple report elements

You can now format multiple report elements simultaneously. Resizing, aligning, defining borders, background colors, or relative positions are examples of what is possible when formatting multiple report elements simultaneously.

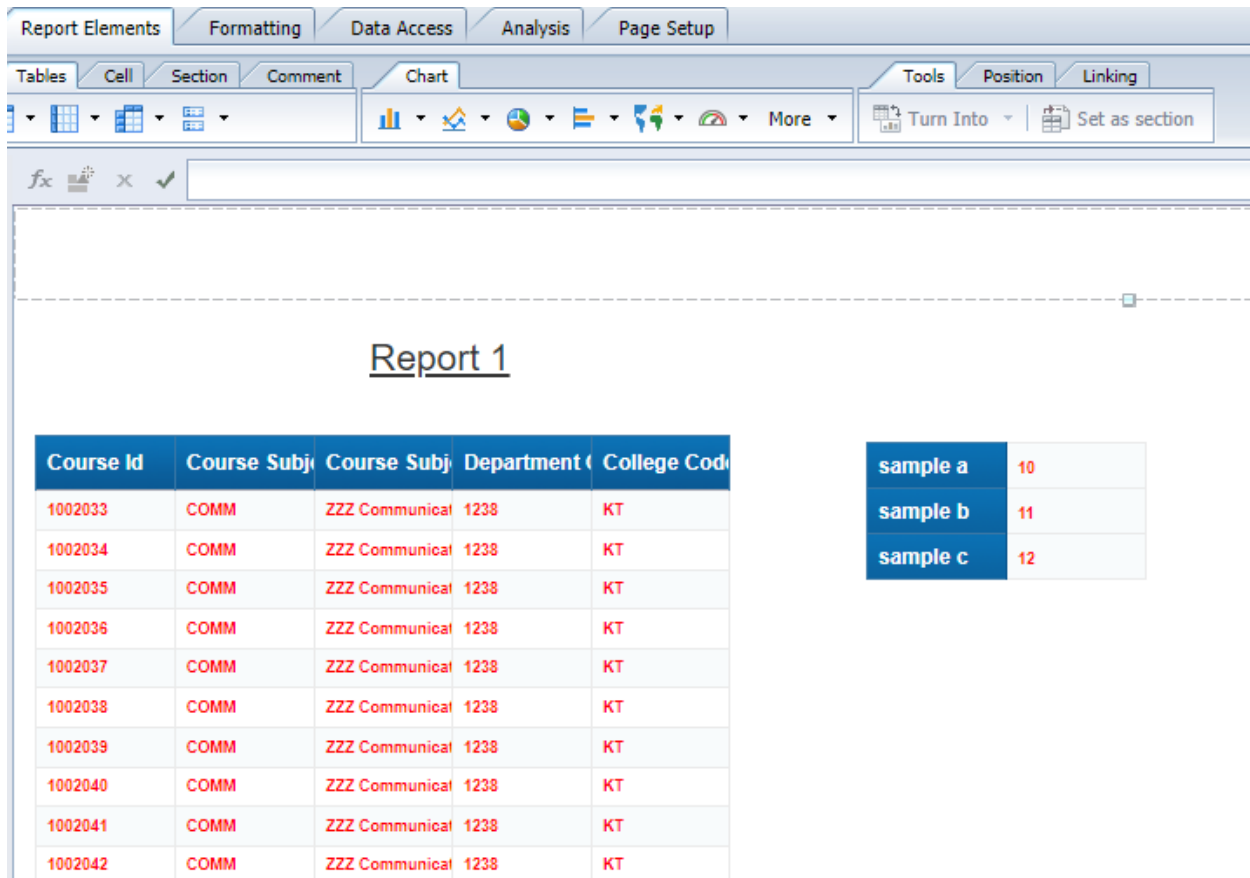

1. Select multiple report elements with Ctrl/Shift Keys

2. Right-click on the elements selected
3. Click Format Cell

4. Make the formatting selections you prefer and click OK
5. Multiple report elements will be formatted simultaneously

The screenshot shows the SAP Web Intelligence report editor interface. The 'Chart' tab is active in the top ribbon, with options for 'Turn Into' and 'Set as section'. Below the ribbon, the report content is displayed under the heading 'Report 1'. It contains two tables: a large data table on the left and a smaller summary table on the right.
