

Prompt Variants

The Prompt Variants allow you to save a set of values for the prompts for future use without having to save additional copies of the report.

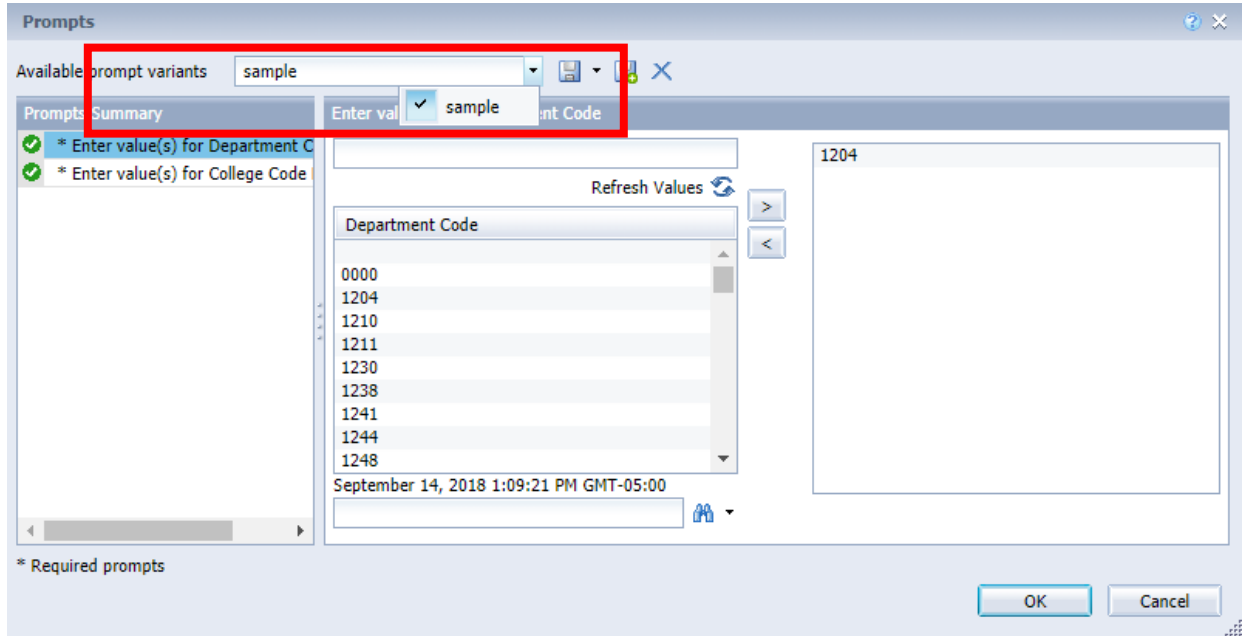

1. Once the prompts have been filled in, click the Create prompt variant icon (computer disk with plus sign)

2. This brings up another window where you can modify and name the variant

- The variant is report specific, but the next time you open the report, the variant as saved is available for use:

- The saved prompt values are entered, and you can run the report by clicking OK
