# **Overview and History**

# History

- **Test scores are used in recruiting, admissions, registration and academic history.**
- **Prior to Banner 7.2, in order to load unsupported test scores there were several options.**
  - Modified SRTLOAD.pc
  - Developed an in-house load program
  - Entered scores manually into SOATEST
- **Modifications are not always a desired option, especially for those sticking to a ‘vanilla’ Banner system.**

## Changes to SRTLOAD.pc

- Hard coded tesc code date origins were removed and srtload reads them from a new table (SRTTPTS)
- SRTLOAD was modified to recognize the following suffixes:
  - \_test\_date
  - \_test\_year
  - \_test\_cent
  - \_test\_mon
  - \_test\_code
  - \_test\_score
  - \_tadm\_code
  - \_rcrv\_ind
  - \_tefr\_code
  - \_teac\_code

## New Form: SRATPTS – Tape File Test Score Controls

- New to Banner 7.1
- Allows you to map the test score code which contains the “date taken” to all the other test score codes for which that same “date taken” applies
- SRTLOAD reads test code date origin from SRATPTS

## Effect of Changes

- **By using a prefix in front of these suffixes, unsupported test scores can now be loaded into Banner.**
- **Benefits of using the set-up forms to load test scores instead of modifying code.**
  - Easier to implement
  - No technical expertise required
  - Easier to manage upgrades

## TOEFL Internet Based Test (IBT)

- **TOEFL has three different ways to take the exam.**
  - Each type of exam reports scores differently.
  - All three types could be delivered on the same file.
- **TOEFL reports test scores in fixed fields for each part of the exam. This is different than how AP delivers test scores.**

## Relationships between Forms

- Follow recommended order of set-up and validation forms.
- The order of some forms can be moved around in the checklist but think about the relationships between the underlying tables.
  - For example, STVINFC depends on values from STVCTYP, STVTSRC, STVSBGI and GTVCMSC.
